

Servicios y Proyectos Mineros de México is created as a Mexican company focused on providing integral services to the mining industry, keeping in mind that our goal is not only to explore, but also to generate a discovery. Our company has the experience needed to develop any kind of duties related to all the stages of the mining exploration of mineral deposits along Mexico and South America.

At SPM, we always follow safety procedures and norms in all our activities in order to prevent risky situations, but we also are engaged to the preservation of the environment and the improvement of the communities where we perform our professional activities.
